

Weekly Report of the 8th week

Pan Jiacheng

2017/04/23

Done

- Added the effect of the animation when click play button: When click the button, it will automatically switch between different years
- Precomputed the position of different years: Before user begin to use this system, we should precomputed the position of the nodes in all the years
- Reconstruct the force-directed layout function: Make it more efficiency to use this service
- Change the data structure of the JSON data: Reduce redundancy of the data

To Do

- Modify the code to accommodate the new data structure.
- Design and Add the information panel
